From Beck/Hart : European State Aid Law: A Handbook before purchasing it in order to gage whether or not it would be worth my time, and all praised European State Aid Law: A Handbook:

This handbook - of practical guidance in European state aid cases - is a completely revised and updated version of the Handbuch des Europäischen Beihilferechts, first published in German in 2003. The book is not specifically concerned

with German law or legal practice, and it will be of general interest to competition lawyers. European state aid law has gained considerably in importance over the last decade. The number of proceedings before the Commission has escalated and the European Courts are increasingly involved with disputes concerning state aid. It fully incorporates the EU Commission State Aid Action Plan ("Less and better targeted state aid: a roadmap for state aid reform 2005-2009"), published mid-2008, and the new version of the General Block Exemption Regulation. The main topics covered include: basic principles . elements of state aid . compatibility of state aid with the Common Market according to Art. 87 Sec.2 and Sec.3 ECT . block exemption regulations . public enterprises . Commission proceedings according to Council Reg. (EC) No. 659/ 1999 . and proceedings before the European courts. To meet the needs of practitioners in Europe and beyond, the handbook also covers state aid concerning venture capital, agriculture, and steel. The contributors are well-known practitioners active in the field of European state aid and competition law.

[an] invaluable [guide] to those needing to grapple with EU law in this area [which] provides substantive and procedural coverage across the whole range of State aids law. Heidenhain and his colleagues have put together a compendious work which will be extremely useful to those needing more finely grained treatment of certain issues in the field?as a result it will prove an excellent reference work, but its fuller coverage of secondary literature means that it may also prove a very helpful resource in stimulating new and critical arguments which may be pursued in future cases. ?the present reviewer's State aids library has been much enriched by [the book] and [it] can be recommended warmly. Angus Johnston Law Quarterly Volume 27, July 2011 About the AuthorDr Martin Heidenhain is a partner of Berlin-based law firm Hengeler. The authors are well-known practitioners active in the field of European state aid and competition law
