Industries (Oxford Law Colloquium):

Regulation and Deregulation is a revised version of papers presented at the Oxford Law Colloquium held at St John's College, Oxford, in March 1998. The Colloquium provided a meeting place for discussion between practitioners and academics interested in regulation. Current themes in the debate about how best to regulate are explored, concentrating in particular on the regulation of utilities and of the banking and financial services industry.

'Distinguished academics and practitioners contributed papers, whose revised and edited versions have been masterly systematised in this book by Christopher McCrudden ... it holds great interest for anyone concerned with regulation and related issues anywhere ... McCrudden's book combines a mixture of good qualities: it is timely, descriptive and inquisitive.' Andrea Silvana Rodriguez, *Oil and Gas Law and Taxation*, November 1999
