Rui Cunha Marques : Regulation of Water and Wastewater Services: An International Comparison before purchasing it in order to gage whether or not it would be worth my time, and all praised Regulation of Water and Wastewater Services: An International Comparison:

This book, published in collaboration with ERSAR, presents a unique account of governance and regulatory methods

used by different countries, states and municipalities that may help regulators and governments all over the world to improve their regulatory approaches. It is the first book to compile such an amount of data about regulatory processes of a wide number of countries from the five continents. It discusses how the characteristics of water and wastewater services call for regulation and how different countries apply distinct regulatory methods. By showing 18 country case-studies, the book offers an interesting perspective as the regulatory models adopted vary immensely depending on geographical location, nature and strength of institutions and governments, political ideology, features and level of development of the countries. In addition, it provides examples of best practices that may be important for policy-makers to enhance the regulatory processes adopted in each country. It looks closely at rules imposed by state and local governments concerning regulatory issues and how they are being applied. Regulation of Water and Wastewater Services covers the fundamental and practical concepts and issues regarding the regulation of water and wastewater services. It describes and compares the regulatory methods adopted in several countries and provides a global overview on regulation. There is detailed coverage of topics such as quality of service regulation, economic regulation and public service obligations. This book is suitable for regulators, academic researchers and students, consultants, operators and managers, policy-makers and other stakeholders. Author Rui Cunha Marques, Center of Urban and Regional Systems (CESUR), Instituto Superior Tecnico, Technical University of Lisbon in collaboration with the Portuguese Water and Waste Services Regulation Authority (ERSAR)
